Sunnyvale, CA

Technical Skills

Front-End Development

HTML5
CSS3
jQuery
jQuery UI
HTTP Request/Response
Ajax
Responsive Web Development

Languages

Python
JavaScript
Swift 3

Databases

SQL (MySQL, SQLite)
NoSQL (MongoDB)
Mongoose.js

Servers

Flask
Node.js

Frameworks

Django
Express/Socket.io
Angular
Core Data (iOS)
Core Location (iOS)
Twitter Bootstrap

Version Control

Git
Github

JS/jQuery Libraries

Highcharts
tablesorter
fancy input
Arctext.js
Complexify.js

Methodology

OOP
MVC/MTV
RESTful Architecture

Full Stack Web Developer

Talented web developer looking to make significant and meaningful contributions in the tech field. Over 1500 hours of experience developing a strong working knowledge of programming languages, methodologies, and frameworks. Strongly self-motivated and a highly persistent work ethic with a positive attitude. Proven ability to pick up new concepts and technologies quickly.

Education

Coding Dojo, January – April 2017

Full Stack Web Development Program, Triple Black Belt

- Achieved self-sufficiency in 3 full stacks (Python, iOS, MEAN)
- Earned a triple black belt (highest recognition given to top students)
- Became adept at solving complex programming projects – from “wireframing” to deployment

Coursera, October 2017 – present

- Learning deeper concepts about applying algorithms, including coming up with alternative solutions to minimize time and space constraints
- Learning “strength through struggle” – sticking with a problem till a solution is found despite many frustrating attempts to solve it

Algorithmic Toolbox by University of California, San Diego & National Research University Higher School of Economics (Certificate Earned on December 11, 2017) 96.1%

University of California, San Diego, September 2010 – June 2015

Bachelor of Science in Cognitive Science with Honors

Upper Division Major GPA: 3.93

Total GPA: 3.52

Experience

Etkin Lab, Stanford School of Medicine July 2015 – September 2016

Volunteer Research Assistant

- Introduced to the Python programming language and the Unix shell

Projects

User Dashboard (akashj.pythonanywhere.com) Web app allowing users to login/register, manage other users, post messages and comments on each other's walls (similar to Facebook), and edit their personal information. Includes full-fledged login/registration functionality including back-end validations. Utilizes knowledge of MTV architecture and password encryption.

Tech – Python, Django, SQLite, Twitter Bootstrap, jQuery, JavaScript, HTML5, CSS3

Pac-Man (ajag408.github.io/pacman) A simple rendition of the popular game Pac-Man. Highlights include the face of Pac-Man/Pac-Woman changing direction based on which way they are moving, a pseudo-randomly moving ghost, and cherries worth extra points.

Tech – HTML5, CSS3, JavaScript*

1942 (ajag408.github.io/1942project) A game designed entirely using HTML, CSS, and JavaScript. Features include the ability to move the hero, collision detection, and an explosion sound when the bullet hits the target.

Tech – HTML5, CSS3, JavaScript*
